

Quote of the month

„More than 34% of the driving instructors in Germany are older than 60 years and thus belong to the so-called risk group in the Corona period. The average age in the 60 + age group is even more than 66 years. It remains to be seen whether or how many driving instructors in this age group will be training in Corona times.“

Jörg-Michael Satz, President of MOVING International Road Safety Association e. V.
