

Quote of the month

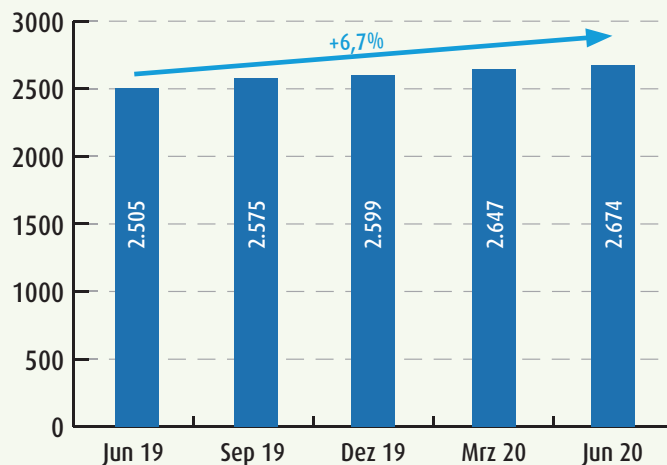

„Despite the serious effects of the Corona pandemic and the first lockdown in the first half of 2020, the number of driving instructors subject to social insurance contributions has increased by 3.6% to 18,879 for the comparison month of June 2019. This is due not least to the steady increase in the proportion of women in the driving instructor profession.“

Jörg-Michael Satz, President of MOVING International Road Safety Association e. V.

Number of socially insured employed driving instructors:

Number of employed female driving instructors in Germany subject to social insurance contributions:
