

## Quote of the month

„In 2020, the police recorded 2,298 accidents involving e-scooters, of which 2,155, or 94%, involved personal injury and people were injured or killed. The main responsibility lay in the hands of the e-scooter drivers in 3 out of 4 accidents with personal injury. Alcohol influence (431 misconduct or 18.3%) and incorrect lane use (392 misconduct or 16.6%) were the most frequent causes of such accidents. MOVING is convinced that a refresher course in driving schools driving schools could have reduced the accidents.“

Jörg-Michael Satz, Präsident von MOVING International Road Safety Association e. V.
