

Quote of the month

„The average number of driving school cars per driving school has almost doubled from 3.5 cars (2016) to 6.7 cars (2024), which corresponds to an increase of 91%. The fleet continues to be dominated by diesel vehicles, which make up about 66% of the stock. I am eager to see how the composition of the fleet, especially regarding the availability of driving school vehicles, will develop in the coming years.“

Jörg-Michael Satz, President MOVING International Road Safety Association e. V.
